Symbols

	Constat Power Motor control electronic system designed to guarantee unvarying performance irrespective of battery charge.		Pluscut Multifunction lawnmowers with collection or mulching system (in mulching operation the grass cuttings are finely shredded and distributed over the lawn surface where they decompose rapidly to become an efficient natural fertiliser).
	EasyOn User-friendly starting system ensures a smooth pick-up of the engine with no kickback, and limits the number of pulls required.		iK-GO Emak engine with electric starter running on a rechargeable battery.
	EasyStart System that offers the same advantages as the EasyOn system but with the addition of reduced kickback, thanks to a double starter spring.		InstartIS Briggs & Stratton engine with electric starter running on a rechargeable battery.
	Decompressor The compression ratio in the cylinder reduces when the starter is pushed in, allowing the engine to be started with less effort.		ReadyStart System that automatically detects the engine temperature and feeds the optimal quantity of fuel to the carburettor. No need for primer or closing of the choke.
	Lateral chain tensioner This device simplifies tensioning adjustments while avoiding any contact with the chain.		3-cutting device Versatile cutting system that includes mulching, pick-up and deflector for rear discharge (optional).
	OnBoard Clutch Reduces the risk of the clutch jamming and simplifies routine maintenance while also making for easier chain replacements.		4-cutting device Versatile cutting system that includes mulching, collection and side discharge as standard, with optional deflector for rear discharge.
	VibCut An antivibration system that isolates the engine from the handles and the body of the machine, considerably reducing the vibrations transmitted to the user during operation so as to guarantee maximum comfort and easy handling.		Deck Wash Quick-fit connector for washing the cutting deck after use. Convenient and practical, it helps keep the deck in tip-top condition at all times.
	SRS Safety Release System Innovative quick release system allowing the operator to step away from the machine in an instant, for maximum protection and safety.		Power Sharp Practical system that enables the chain to be sharpened in just 5 seconds without the use of tools. Simply attach the sharpening stone device onto the guide bar and operate the chain saw at maximum speed, pressing hard against the device for several seconds.
	4-Stroke Four-stroke engines that reduce unburned hydrocarbon emissions by up to 85% and nitrogen oxide emissions by up to 65%. Tilttable through 360°, they run smoothly in any position.		Premium Safety A complete line of protective work clothing. Ensures maximum safety without restricting movement.
	AlwaysOn On/off switch that returns automatically to the "on" position after each stop, thus eliminating the risk of flooding the carburettor.		Original accessories and spare parts Quality mark identifying original Emak parts and accessories. Designed to the most stringent quality standards, these items guarantee smoother operation of the machine and longer service life.

The Emak Group

Our Vision

"Innovative solutions for the best customer value"

We aim to operate as one of the world's foremost players in the development, production and distribution of machines, components and accessories for gardening, agriculture, forestry and industry, with an offering of innovative products and services designed to make the work of our clients in the consumer and professional markets efficient and enjoyable, guaranteeing that they always receive the highest possible value.

Structure

The **Emak Group** is active in the development, production and worldwide sale of an extensive range of products for three business segments:

Outdoor Power Equipment

- products for gardening, forestry and agriculture, including brushcutters, lawnmowers, garden tractors, chainsaws, rotary tillers and rotary cultivators.

Pumps and High Pressure Water Jetting

- products for agriculture, including centrifugal and diaphragm pumps for crop spraying and weed control;
- products for industry, including pumps for industrial applications and high and very-high pressure systems;
- products for cleaning, namely professional and semiprofessional high-pressure washers, floor scrubber-dryers and vacuum sweepers.

Components and Accessories

- products such as trimmer line and line heads for brushcutters, accessories for chainsaws, guns, valves and nozzles for high-pressure washers and for agricultural applications, plus precision farming products (sensors and computers).

The group has approximately **2,000 employees** overall.

Outdoor Power Equipment

Our Passion

Emak's green ethos is made up of certainty, innovation and completeness. Our green credentials are based on care, respect, passion and design focus. That's why, with our **Efco**, **Oleo-Mac**, **Bertolini** and **Nibbi** brands, **Emak** stands as a benchmark in groundcare and garden maintenance for professionals and amateurs alike. A passion that has been all-Italian for more than 50 years. There's an **Emak** for everyone.

Structure

Emak operates in the **Outdoor Power Equipment** segment through **9** companies engaged in the development, production and sale of products for gardening and forestry, and small agricultural machines, including brushcutters, lawnmowers, garden tractors, chainsaws, rotary tillers and rotary cultivators.

Outdoor Power Equipment

Products and Accessories Range

Gardening, farming and forestry tools for home users and professionals. **Efco** covers all shades of green. With different models to meet each user's needs but all sharing the same exceptional quality standards in terms of performance, reliability, comfort and safety. The accessories range is offered as an extension and completion of the product range. Ergonomics, quality and styling are essential ingredients of the development of **Efco's** products: primarily designed to meet the needs of professionals whilst also taking care of the requirements of less expert users who insist on the very best. A truly comprehensive range of superb quality products at highly competitive prices – that's the **Efco** formula.

Home-plus

Home-plus

A range of machines aimed at the home user, for tidying and cleaning the garden, cutting hedges and small trunks or stems, and DIY jobs in general. Characterized by lightweight and compact construction, to make the task of the operator that much simpler. Easy to start, easy to use, easy to maintain: these are the ideal tools for getting things done quickly and neatly around the home.

Tough-tech

Tough-tech

Solid and dependable, these are machines designed for heavy and frequent use in countryside environments: clearing overgrown and uncultivated areas, pruning and cutting firewood, crop irrigation and disinfestation tasks. Designed adopting solutions certain to ensure high work rates and maximum durability over time.

Sharp-pro

Sharp-pro

No-nonsense everyday tools for the busy professional, these are machines that stand out for the toughness of their components, their high performance and their matchless long-term durability. Specific materials used in construction guarantee unwavering quality even when tackling the most severe and lengthy of tasks, like forestry work and the clearance of uncultivated areas or scrub and undergrowth.

The evolution of eco-friendly tools: quiet, practical and versatile.

Technology and comfort

The **Efco** battery-powered range constitutes the evolution of DIY gardening power tools. These tools combine efficiency and performance akin to that of their medium power petrol engine counterparts, with the practicality and ease of use typical of a battery-powered tool. Switching to **Efco** battery-powered products removes the hassle of preparing fuel/oil mixture, making sure it doesn't deteriorate, and dealing with oil and fuel spills. The battery used is a high-tech device, compatible with a huge number of charging cycles equivalent to many years of use, whether fully charged or partially charged. The battery is also completely interchangeable, functioning like an energy store that's always ready for use with any application in the range. Finally, **Efco** battery-powered tools deliver the all-important guarantee of environmental respect, thanks to the absence of combustible fuel and the elimination of noise pollution. The attractive styling of **Efco** battery-powered products makes them absolutely unique and iconic in the field of garden maintenance equipment.

Exterior mounted battery to reduce structural bulk without reducing ruggedness or increasing weight.

Machines designed for optimal balance and minimal operator fatigue.

Fully interchangeable batteries rated 2.5 or 5 Ah, compatible with all applications in the range.

Motor control electronic system designed to guarantee unvarying performance irrespective of battery charge.

Adjustable speed blower to provide exactly the right power for the job in hand.

Steel deck lawnmower, cutting diameter of 41 or 46 cm, with facility to operate also with a double battery for the utmost flexibility and to mow areas of up to 1000 m².

Battery-powered products

Battery-powered Chainsaws

The cordless battery-powered chainsaw is the perfect tool for pruning, cutting branches and small and medium-sized firewood. The battery-powered chainsaw stands out for its compact and ergonomic design for more comfortable use of the tool. Equipped with a top notch Oregon cutting tool with high-strength thin chain for optimal penetration, the **MTi 30** battery-powered chainsaw is ideal for DIY duties, eliminating the exhaust fumes and noise of a petrol engine tool with no compromise in terms of performance and reliability.

Low weight and compact dimensions.

Oregon 12" bar and chain.

No-tools chain adjustment.

MTi 30

Motor type	Brushless
Voltage	40 V
Operating batteries	Bi 5,0 EF
Bar type	Oregon, sprocket-nose
Bar length	30 cm / 12"
Chain pitch	3/8" x .043"
Chain speed	16 m/s
Oiler	automatic/zero oil flow with motor stopped
Oil reservoir capacity	0.2 L
Chain tensioner	tool-free, knob system
Working time up to (*)	160 cuts
Weight without battery	2.8 kg
Charging time with CRG	220' (5.0 Ah)
Charging time with FAST CRG	70' (5.0 Ah)

* Cut of wood section up to 10 cm diameter. Working time can be subject to variations according to working conditions and type of wood to be cut

Available from spring 2021

Battery-powered Hedgetrimmers

The freedom of movement allowed by the absence of a power cable makes battery-powered hedgetrimmers ideal for duties around the garden. Equipped with high quality laser-treated blades to ensure high cutting precision without damaging vegetation, battery-powered hedgetrimmers are the perfect solution thanks to their ergonomic design and total absence of exhaust emissions. The rugged gearbox ensures reliability and long life, while the batteries provide up to 2 hours of continuous operation so that jobs can be completed on a single charge.

High quality laser-sharpened 45 cm blades.

Very long working times.

Dual action.

TGi 45

Motor type	Brushed
Voltage	40 V
Operating batteries	Bi 2,5 EF / Bi 5,0 EF
Blade type	dual action
Blade length	45 cm
Blade tooth spacing	20 mm
Sound pressure/power level	81.4/90 dB(A)
Lh/rh vibration level	< 2.5 m/s ²
Running time, light use (*)	60' (2.5 Ah) / 120' (5.0 Ah)
Running time, intensive use (*)	45' (2.5 Ah) / 90' (5.0 Ah)
Weight without battery	3.0 kg
Charging time with CRG	110' (2.5 Ah) / 220' (5.0 Ah)
Charging time with FAST CRG	50' (2.5 Ah) / 70' (5.0 Ah)

(*) Indicative data which may vary depending on working conditions and the type of vegetation cut

Battery-powered Brushcutters

The **DSi 30** is an irreplaceable tool for working around the garden. Combines the low weight and ease of use typical of battery powered tools with the practicality of a Load&Go line head, easily refillable without the use of tools. Performance is fully comparable with that of a medium power petrol engine brushcutter, with 30 cm cutting diameter and 2 mm diameter “Pro-Silent” line.

Rugged and well-balanced handle.

30 cm cutting diameter.

Load&Go head.

DSi 30

Motor type	Brushed
Voltage	40 V
Operating batteries	Bi 2,5 EF / Bi 5,0 EF
Cutting diameter	30 cm
Cutting equipment	103 mm dia. Load&Go line head with 2 mm dia. nylon line
Handle	single, adjustable
Sound pressure/power level	76/87 dB(A)
Lh/rh vibration level	< 2.5 m/s ²
Running time, light use (*)	30' (2.5 Ah) / 60' (5.0 Ah)
Running time, intensive use (*)	20' (2.5 Ah) / 40' (5.0 Ah)
Weight without battery	2.9 kg
Charging time with CRG	110' (2.5 Ah) / 220' (5.0 Ah)
Charging time with FAST CRG	50' (2.5 Ah) / 70' (5.0 Ah)

(*) Indicative data which may vary depending on working conditions and the type of vegetation cut

Battery-powered Lawnmowers

The transition to battery power offers significant benefits even for lawnmowers, including results that rival classic petrol engine machines. With these machines (of which **LRI 44** and **LRI 48** are also available in a self-propelled version), mowing duties benefit from ease of use, reduced noise levels and the complete elimination of exhaust gas. Forget about having to empty the fuel tank to prepare for winter storage, replace the spark plug, clean the air filter, or worry about stored fuel-oil mixture deteriorating: all this is no more than a distant memory with battery-powered motors, without any compromise in performance. The **LRI 44** and **LRI 48** are both equipped with a double battery housing, making it possible to extend running time with up to two 5 Ah batteries, sufficient for mowing larger areas. Both machines feature a steel deck, centralised cutting height adjustment controls, generously sized grass catcher and, for **LRI 48** models, a 4-in-1 cutting function, allowing for cutting without grass collection, with mulching system or side discharge. Model **LRI 40 P** is suitable for small gardens thanks to its compact plastic deck and maneuverability.

LRI 40 P*** **LRI 44 P** **LRI 44 T***** **LRI 48 P** **LRI 48 T**

(*) Cutting performance depends on several factors including: garden shape, surface characteristics (length, grass moisture), ground speed, type of cut (collection, mulching or side discharge)

*** Available from spring 2021

Battery-powered Blowers

With the leaf blower having become an essential piece of equipment for clearing work in the yard and garden, the **SAi 60** is the most modern and practical version thanks to its battery operation, ideal power output for various duties, and air velocity control.

Air outlet velocity regulator.

Constant performance irrespective of battery charge.

Well-balanced tool.

SAi 60

Motor type	Brushless
Voltage	40 V
Operating batteries	Bi 2,5 EF / Bi 5,0 EF
Max outlet air velocity	40 m/s
Adjustable air velocity	yes, specific command (roller)
Sound pressure/power level	83.2/97 dB(A)
Vibration level	< 2.5 m/s ²
Running time, maximum speed	15' (2.5 Ah) / 30' (5.0 Ah)
Running time, minimum speed	40' (2.5 Ah) / 90' (5.0 Ah)
Weight without battery	3.3 kg
Charging time with CRG	110' (2.5 Ah) / 220' (5.0 Ah)
Charging time with FAST CRG	50' (2.5 Ah) / 70' (5.0 Ah)

Bi Batteries

The **Efco** range of batteries comprises two power ratings: 2.5 and 5 Ah, both of which are the same dimensions and perfectly interchangeable in all applications. Equipped with indicator system to overload cutout and battery charge. When the tool is in use the LEDs constantly show the charge status of the batteries.

Charge level constantly visible during use.

Bi 2,5 EF

Bi 5,0 EF

	Bi 2,5 EF	Bi 5,0 EF
Charging time with CRG	110 min	220 min

Capacity	2.5 Ah	5 Ah
Technology	Lithium Ion cells	Lithium Ion cells
Charge levels	4 LEDs	4 LEDs
Weight	0.7 kg	1.3 kg

Cannot be used on the **LRi 48** lawnmower.

CRG Battery chargers

For charging **Bi 2,5 EF** and **Bi 5,0 EF** batteries and keeping them in perfect condition. Use of the latest electronics means batteries are charged in complete safety to maximise their working life and minimise mains power consumption. The **FAST CRG** charger also makes it possible to have the charging time: this means it takes just 50 minutes to charge the 2.5 Ah battery. GS and ETI certified, the battery chargers are available with different plug types (EU, UK and US standard).

The battery charger body is designed to allow it to be hung on a wall.

Powerful, versatile and easy to use:
your indispensable helpmates
for cutting and pruning.

Technology and comfort

Pruning, felling, limbing and DIY: there's an **Efco** chainsaw to meet the needs of every task, whether in the garden or in the woods. Albeit with different characteristics, all the models share quality, ease of use and maintenance, and reliable top performance. Top-quality bars and chains ensure clean and accurate cuts, without damaging the vegetation. Even in the event of prolonged use, our chainsaws offer superior performance and maximum efficiency thanks to the low fuel consumption and smooth and constant engine torque. The high standards of technical equipment fitted as standard ensure the maximum safety which, in the electric models, is attested to by our international certifications, including GS and IMQ.

Piston with 2 rings, forged and machined steel crankshaft and connecting rod, needle roller bearings, nickel plated cylinder: high and constant efficiency guaranteed over time, even when undertaking heavy work schedules.

The EasyOn starting system ensures any user can set the machine running simply and effortlessly, with a minimal number of pulls on the cord.

The Primer facilitates starting even in the harshest climates.

Fuel tank with externally visible level; easy management of refueling intervals.

Aluminium oil pump: ensures zero flow with engine idling and long, durable service.

"Ice device": ensures the machine can operate without difficulty even at low temperatures (below 0°C), avoiding the formation of ice on the air filter.

H series petrol engine Chainsaws

Compact

At the entry level of the **Efco** range, “**H**” series chainsaws are designed to provide the ideal combination of performance and economy for jobs around the home and on smallholdings. Perfect for home use, **MTH 4000** model is the most compact and lightweight in the series, featuring innovative design, top-of-class performance and extremely reliable components.

Nylon filter: the large filtration surface increases working time between filter cleaning operations.

EasyOn: reduced kick-back easy starting system.

Lateral chain tensioner: simplifies tension adjustments while avoiding all risks of contact with the chain.

Adjustable aluminium oil pump: facilitates the operator's job by allowing the oil feed to be adjusted to suit the workload on the machine and the bar/chain combination. Zero oil flow with the engine at idling speed ensures lower consumption and reduced environmental impact.

Chain (pitch x gauge)	Oregon 3/8" x .050"
Oil pump	automatic in aluminium/adjustable/zero flow rate at idle speed
Oil/fuel tank capacity	0.22 L/0.32 L
Sound pressure/power level	103.2/111.5 dB(A)
Lh/rh vibration level	6.9/7.1 m/s ²
Dry weight without bar and chain	4.5 kg

H series petrol engine Chainsaws

Medium power

Suitable for home use and for smallholders, the higher displacement “H” series chainsaws provide the ideal combination of performance and economy.

Low operating temperatures: enhanced operator comfort and safety, plus longer engine life.

Minimal vibrations: guaranteed by the machine's anti-vibration systems, which enhance the overall operating comfort.

Nickel plated cylinder: for longer working life.

Stable fuel-air mixture: for smooth operation of the machine.

MT series petrol engine Chainsaws

Compact

The compact chainsaws are designed incorporating the technology used in higher power models: they guarantee performance at the top of their category, ensuring the maximum efficiency and minimum expenditure of time and energy. Occasional minor pruning tasks or cutting small diameter firewood can be carried out using practical and easy-to-use tools. The devices specifically designed for incorporation on these models make for extremely practical use and routine maintenance.

Piston with 2 rings, forged and machined steel crankshaft and connecting rod, needle roller bearings, nickel-plated cylinder: high and constant efficiency guaranteed over time, even when undertaking heavy work schedules (MT 3710, MT 4110).

Nylon filter for **MT 3710** and **MT 4110**: longer working time between filter cleaning operations thanks to the large filtration surface.

EasyOn starting system: reduces recoil kick-backs during engine starts (**MT 3710, MT 4110**).

Lateral chain tensioner for **MT 3710** and **MT 4110**: simplifies tensioning adjustments while avoiding all risks of contact with the chain. The fixing nuts are integral with the chain guard: no risk of nuts falling or getting lost for easier fastening.

MT series petrol engine Chainsaws

Medium power

The medium power petrol engine chainsaws are sufficiently compact for intensive use and compatible with frequent use. Designed to accommodate the needs of the most demanding users on farmland, woodland, as well as in the garden. The versatility combined with an excellent power-weight ratio guarantee optimal cutting performance in all types of applications, such as limbing, pruning and cutting of medium-size trunks. These chainsaws are designed to offer exceptional performance for demanding tasks, from gardening to agriculture.

Piston with 2 rings, forged and machined steel crankshaft and connecting rod, needle roller bearings, nickel-plated cylinder: constant efficiency through time, even when undertaking heavy work schedules.

Nylon filter: the large filtration surface increases working time between filter cleaning operations.

EasyOn starting system: reduces recoil kick-backs during engine starts (**MT 4510**).

The cylinder of model **MT 4510** allows exhaust gas recirculation and is optimised to allow appreciable reductions of fuel consumption.

Dry weight without bar and chain	4.5 kg	5.4 kg

Professional petrol engine Chainsaws

The professional chainsaws are powerful machines designed for felling, cutting and sectioning large trees. The variable advance digital coil with rpm limiter guarantees a smooth-running engine and improved cooling, even in difficult weather conditions. The handle and fuel tank are separate from the machine body, thus reducing the fuel/oil mixture temperature and minimising the transmission of vibration. The aluminium oil pump is automatic and adjustable so the flow rate can be adapted in accordance with the task to be performed, thus avoiding wastage.

Anti-vibration system composed of 6 vibration dampers - 2 spring dampers and 4 rubber stops: interposed between the handle and the crankcase, the dampers ensure optimal isolation from vibration for enhanced operator comfort.

Nylon filter: the large filtration surface increases working time between filter cleaning operations.

Decompression valve: facilitates engine starting without kick-back, reducing operator effort.

OnBoard clutch: quick fitting of bar and chain, cleaner clutch for lasting performance.

Petrol engine pruning Chainsaws

The power, manoeuvrability and accuracy required during pruning and tending of plants, olive groves and orchards are guaranteed by the quality of the **MTT 2500** pruning chainsaw, the flagship model in this category owing to its manoeuvrability, low weight and superior power. The combination of these three aspects in a single product make the **MTT 2500** the perfect tool for efficient, quick and safe pruning operations. Power, ergonomics and balance are the distinguishing features of the **MTT 3600** chainsaw. Compact and with an excellent power to weight ratio, it's the ideal chainsaw for pruning tasks at height on tall trees, for limbing and for felling. Its ability to handle the toughest jobs makes it the perfect tool in the hands of professional tree-climbers. The low-emission eco-friendly engine is protected by a double air filter in foam and nylon, and the high-speed high-power chain guarantees clean and accurate cuts without damaging the bark. Models **MTT 2500** and **MTT 3600** are designed by **Giugiaro**, a world leading brand in the industrial design field.

MTT 2500 available also with 1.1 mm chain and sprocket-nose bar (0.043" thickness).

Snap hook: fold-away steel snap hook for rapid attachment of the tool to the operator's harness.

OnBoard clutch: quick fitting of bar and chain, cleaner clutch for lasting performance.

AlwaysOn switch: rapid engine stopping and, thanks to the autoreset function, always ready to restart.

Translucent tanks: allow easy monitoring of oil and fuel levels, thus reducing unscheduled stops for top-ups (**MTT 2500**).

H series pruners

These pruners are designed to easily solve the problem of cutting and limbing at height, while at the same time guaranteeing a constantly comfortable and safe working position: these tools eliminate the need for access solutions such as ladders and platforms of various types once and for all. If you want the best value for money, the **PTH 2500** model is an excellent choice. Lightweight and easy to handle, it is well suited for jobs around the home and on smallholdings.

Piston with 2 elastic rings, forged and machined steel crankshaft and connecting rod, needle roller bearings, nickel plated cylinder: constant high efficiency guaranteed over time, even when undertaking heavy work schedules.

Exceptional reliability thanks to the Ø 8mm rigid drive shaft running on 6 self-lubricating plain bearings.

AlwaysOn switch: rapid engine stopping, and thanks to the autoreset function, always ready to restart.

PTH 2500

Power/Displacement	1.2 HP – 0.9 kW/25.4 cm ³

Telescopic pruners

Model **PTX 2710** is designed to solve your cutting and limbing problems at a height with ease, while at the same time guaranteeing a constantly comfortable and safe working position. Suitable for use in woodland, in rural surroundings and in urban open spaces, this tool eliminates the need for access solutions such as ladders and platforms of various types once and for all. Thanks to the telescopic pole that can be extended up to 3.12 metres, this chainsaw can reach branches up to 5 metres from the ground. The pruner can be adjusted to 5 intermediate angles from 0° to 90°, thanks to a device that allows excellent performance in any working position and allows a far clearer view of the cutting area. The aluminium engine shroud affords superior mechanical strength. The professional oil pump ensures constant lubrication of the bar and chain.

Piston with 2 rings, nickel-plated diecast cylinder, forged connecting rod and crankshaft: all features guaranteed to make the engine extremely rugged and durable.

Straightforward pruner fixing system: with 5 alternative cutting positions (from 0° to 90°) for maximum visibility of the operating area and greater precision.

AlwaysOn switch: rapid engine stopping and, thanks to the autoreset function, always ready to restart.

Aluminium clutch housing and cover: optimised and reduced weight of the machine while imparting high strength and lasting reliability.

Guide bars description and key

	Bar	Bar type	Nose	Bar length	Pitch	Gauge			
						.043"	.050"	.058"	.063"
						1.1 mm	1.3 mm	1.5 mm	1.6 mm
	Micro-lite® Thanks to their reduced thickness and low engine power absorption, Micro-Lite bars are ideal for all types of DIY applications. These guide-bars ensure the maximum lightweight, low vibration, and reduced kickback.	Laminated	Sprocket	10"-12"-16"-18" / 25-30-41-46 cm	.3/8" .325"	●			
	Laminated with Sprocket nose Designed for DIY and semi-professional use, are ideal for lightweight, versatile, and highly reliable chain saws. Equipped with a special barrier dam that prevents the loss of oil, these guide-bars ensure perfect lubrication, top performance, and longer working life of both bar and chain.	Laminated	Sprocket	12"-14"-16"-18"-20" / 30-35-41-46-51 cm	.3/8" .325"	●			
	Solid with Replaceable Sprocket Nose (Power Match®) Nose Designed for professional applications, are equipped with an efficient oiling system (Lubrijet®) thanks to an angled hole on the bar that is kept clear by the transit of the chain drive links. The replaceable nose is available for .325" and .3/8" pitch chains.	Solid	Replaceable Sprocket Nose	15"-16"-18"-20"-22"-24"-25"-28" / 38-41-46-51-56-61-64-71 cm	.3/8" .325"		●		
	Solid with Stellite Nose For professional use, guarantee excellent performance and lifetime even in the most adverse conditions and when subjected to prolonged stress. The stellite bar nose offers the maximum wear resistance. The chains are equipped with an efficient oiling system (Lubrijet®) that features an angled hole on the bar that is kept clear by the transit of the chain drive links.	Solid	Stellite	10"-18"-20"-24"-25"-28"-30" / 25-46-51-61-64-71-76 cm	.1/4" .3/8"		●		
	Solid with Stellite Nose For professional use, guarantee excellent performance and a long working lifetime even in the most adverse conditions and when subjected to prolonged stress. The stellite bar nose offers the maximum wear resistance.	Solid	Stellite	30"-36" / 76-91 cm	.404"				●
	Power Sharp Practical system consisting of a sharpening stone, guide bar and a special chain that can be sharpened in just 5 seconds without the use of tools. Simply attach the sharpening stone device onto the guide bar and operate the chain saw at maximum speed, pressing the foot of the device hard against a solid object for several seconds. At this point the chain is sharpened and the operator can resume work immediately.	Laminated	Sprocket	16" / 41 cm	.3/8"		●		

Precision, safety and freedom of movement: all the ingredients of the perfect cut.

Technology and comfort

With their high performance engine and top-quality blades, **Efco** hedgetrimmers are a guarantee of excellence. Lightweight, powerful and easy to use, these tools are perfect for tackling all types of hedges with clean and accurate cutting action, essential for the aesthetic results of the job and to protect the health of the plants. Ease of use of **Efco** hedgetrimmers is assured also by the Primer and EasyOn devices, designed to facilitate engine starting, even in cold weather conditions.

High quality blades with top cutting edge ensure a clean and precise cut that will not damage vegetation. Equipped with adjustment system for adaptability to any type of foliage.

Professional grade aluminium gear case, drive linkage with pinion carried in bearings and rods with rollers, combining to guarantee long life, low noise and minimal vibration.

EasyOn system to guarantee reduced effort and speed of starting.

Large paper air filter for higher filtration capacity and more effective engine protection, even in dusty conditions.

Anti-vibration system utilizing 4 springs guaranteeing total isolation from the operator's hands.

Rear swivel handle rotatable through 180°: ensures easy trimming even when working at an angle (double-sided blade models only).

Electric Hedgetrimmers

Lightweight, compact and agile: the practical electric hedgetrimmers are equipped with a motor that offers performance comparable to the petrol engine models. Electric hedgetrimmers, designed to handle smaller occasional jobs with ease, are the ideal tools for amateur gardeners. Suitable for trimming and pruning medium size hedges or bushes and relatively sparse vegetation, these tools are fitted with a quiet running motor that makes them suitable for use around residential areas.

Double safety switch on the handle for maximum operator safety.

180° swivel handle: allows the tool to be used also when holding it at an angle.

Transparent hand guard for maximum visibility of the work area.

Battery-powered Hedgetrimmers

The freedom of movement allowed by the absence of a power cable makes battery-powered hedgetrimmers ideal for duties around the garden. Equipped with high quality laser-treated blades to ensure high cutting precision without damaging vegetation, battery-powered hedgetrimmers are the perfect solution thanks to their ergonomic design and total absence of exhaust emissions. The rugged gearbox ensures reliability and long life, while the batteries provide up to 2 hours of continuous operation so that jobs can be completed on a single charge.

High quality laser-sharpened 45 cm blades.

Very long working times.

Professional petrol engine Hedgetrimmers

The professional hedgetrimmers have all the features needed to prune very large and thickly vegetated hedges without problems. Powerful and rugged and yet still light enough to be easily manageable, these models have steel blades and an aluminium gearbox: top quality components that ensure consistently high efficiency through time.

Piston with 2 rings, forged and machined steel crankshaft and connecting rod, needle roller bearings, nickel-plated cylinder: constant efficiency through time, even when undertaking heavy work schedules.

High quality steel blades with top cutting edge: designed to ensure a clean and precise cut that will not damage vegetation. Equipped with adjustment system for adaptability to suit any type of foliage.

Model **TGS** with AlwaysOn switch: rapid engine stopping and, thanks to the autoreset function, always ready to restart.

Single blade deflector for **TGS 2470 P**. Useful for collecting foliage to ensure it doesn't remain lodged in the hedge, hindering the progress of the operator.

Petrol engine shaft Hedgetrimmers

Uneven or steeply sloping terrain and hard-to reach vegetation are no longer a problem for pruning work thanks to the shaft hedgetrimmers. The ergonomic and comfortable handles are equipped with safety switches designed to stop the tool if the operator releases it. High cutting quality is achieved thanks to the double-edge blade, adjustable through 180° with 12 intermediate positions.

Piston with 2 rings, nickel-plated diecast cylinder, forged connecting rod and crankshaft: all features guaranteed to make the engine extremely rugged and durable.

EasyOn starting system: reduces kick-back when starting.

AlwaysOn switch: rapid engine stopping and, thanks to the autoreset function, always ready to restart.

High quality steel blades, rotatable through 12 different positions from 0° to 180°: the blades provide clean and accurate cutting action to safeguard the health of the hedge.

Lawns, ditches, undergrowth:
a perfect cut knows
no obstacles.

Technology and comfort

Efco has designed a brushcutter for all types of cutting and finishing work. **Efco** models are equipped with engines that deliver a high torque even at low speed. The many features of these models, including the self-lubricating bushes and ergonomic handles, ensure the maximum user comfort when working with these tools. Other aspects, such as the generous size of the clutch, the steel composition of the crankshaft or the two piston rings, make our brushcutters safe and reliable workmates that are guaranteed to endure through time. The safety devices provided make **Efco** tools suitable for both professional and home use.

Forged steel crankshaft and piston with two rings: guarantees longer working life.

Ergonomic loop and handles: clad in soft rubber to provide an anatomic and comfortable grip of the tool in all operating conditions.

AlwaysOn on/off system: returns automatically to the start position after each stop, avoiding flooding of the engine.

Filter support with anti-backflow element (Emak patent): prevents the filter from becoming fouled by fuel and guarantees longer operation between filter maintenance procedures.

User-friendly starting EasyOn system that ensures smooth engine pick-up with no kickback and a limited number of pulls

Large size paper air filter for higher filtration capacity, guaranteeing excellent protection of the engine also in very dusty conditions

Electric Trimmers

Electric trimmers are the perfect tool for clearing small plots of land, combining high performance with easy use. Ranging in power from 600 to 850 W, these tools are particularly indicated for occasional jobs at home, such as tidying the lawn and finishing the edges.

H series petrol engine Brushcutters

Lightweight

“H” series brushcutters are at the entry level of the **Efco** range. These brushcutters are designed to guarantee the ideal combination of performance and economy, for jobs in home gardens and on smallholdings. Specifically, these compact and lightweight models are perfect for tidying and edging lawns.

Piston with 2 rings, forged and machined steel crankshaft and connecting rod, needle roller bearings, nickel plated cylinder: constant high efficiency guaranteed over time, even when undertaking heavy work schedules.

Exceptional reliability thanks to the Ø 8 mm rigid drive shaft running in 6 self-lubricating plain bearings.

AlwaysOn switch: rapid engine stopping, and thanks to the autoreset function, always ready to restart.

Ø 110 mm Tap&Go EVO line head, Ø 2.4 mm line, Tap&Go operation.

H series petrol engine Brushcutters

Medium power

At the entry level of the **Efco** range, “**H**” series brushcutters are designed to provide the perfect compromise of performance and economy for jobs in home gardens and on smallholdings. These models deliver constant torque and power even at low speeds, making them suitable for the most demanding jobs.

Piston with 2 rings, forged and machined steel crankshaft and connecting rod, needle roller bearings, nickel plated cylinder: constant high efficiency guaranteed over time, even when undertaking heavy work schedules.

Exceptional reliability thanks to the Ø 8 mm rigid drive shaft running in 6 self-lubricating plain bearings.

H series petrol engine Brushcutters

Multifunction

As the name suggests, “H” series multifunction brushcutters have multiple uses. Designed to meet the needs of those who occasionally need extra equipment, it combines several high-performance tools in a single machine. As well as pruning bushes, it is very useful for cutting the lawn and trimming hedges. Thanks to the separately purchasable applications and the no-tools quick coupling system, changing activities in the same work session can be done simply and rapidly.

Piston with 2 elastic rings, forged and machined steel crankshaft and connecting rod, needle roller bearings, nickel plated cylinder: constant high efficiency guaranteed over time, even when undertaking heavy work schedules.

Exceptional reliability thanks to the Ø 8mm rigid drive shaft running on 6 self-lubricating plain bearings.

AlwaysOn switch: rapid engine stopping, and thanks to the autoreset function, always ready to restart.

Weight	0.9 kg
Shaft arm diameter	26 mm
Length	1000 mm

STARK series petrol engine Brushcutters

Lightweight

STARK lightweight brushcutters are recommended for tidying and edging lawns in the garden for home users and in larger open spaces. The robust technological solutions adopted guarantee consistently high quality over time. These brushcutters are available with either a rigid drive shaft or with a curved shaft arm to adapt easily to suit all styles of use.

DS series petrol engine Brushcutters

Lightweight

The lightweight brushcutters are recommended for tending the lawn and finishing the edges, both in home gardens and in larger open spaces. The engine of **DS 2410** models has been upgraded in terms of performance: constant torque and power output also at low speeds for improved working capacity.

Piston with 2 rings, nickel-plated diecast cylinder, forged connecting rod and crankshaft: all features guaranteed to make the engine extremely rugged and durable.

WALBRO digital coil with electronic control and revs limiter: for easier starting, enhanced performance thanks to uniform combustion, and reduced fuel consumption.

The illustrated step-by-step start-up instructions ensure quick and safe starting, even for less expert users (**DS 2410** models).

Ø 130 mm Load&Go head: assures quick and straightforward line replacement - just 20 seconds to rewind the line and resume work.

Speed&Go

DS 2410 S, DS 2410 T available also with **Speed&Go** line head. See page 66 for more information.

DS series petrol engine Brushcutters

Medium power

DS 2700, DS 3000 and DS 3500 models are recommended for use by experts engaged in intensive and continuous work, such as gardeners carrying out finishing operations or small grass cutting jobs. High efficiency even under strain, but never impairing the high level of operator comfort and easy handling.

Piston with 2 rings, nickel-plated diecast cylinder, forged connecting rod and crankshaft: all features guaranteed to make the engine extremely rugged and durable.

WALBRO digital coil with electronic control and revs limiter: for easier starting, enhanced performance thanks to uniform combustion, and reduced fuel consumption.

Aluminium clutch housing and cover: optimised and reduced weight of the machine while imparting high strength and lasting reliability.

Ø 130 mm Load&Go head: assures quick and straightforward line replacement – just 20 seconds to rewind the line and resume work.

DS series petrol engine Brushcutters

Multifunction

As the name suggests, multifunction brushcutters have multiple uses. Designed to satisfy the demands of both private and professional users, they combine the performance of different machines in a single tool. As well as pruning bushes, they are very useful for cutting the lawn, trimming hedges and blowing away leaves or debris. Thanks to the separately purchasable applications and the no-tools quick coupling system, changing the activity in the same work session can be done simply and rapidly. The models in the catalogue are available with two engine displacements, both compatible with the same applications.

Piston with 2 rings, nickel-plated diecast cylinder, forged connecting rod and crankshaft: all features guaranteed to make the engine extremely rugged and durable.

WALBRO digital coil with electronic control and revs limiter: for easier starting, enhanced performance thanks to uniform combustion, and reduced fuel consumption.

The illustrated step-by-step start-up instructions ensure quick and safe starting, even for less expert users (**DS 2410** models).

The “no tools” quick fit system makes it possible to switch between applications easily and without using tools.

Professional petrol engine Brushcutters

These tools are ideal for professionals and groundcare operators, also when working on large surface areas. Strong and sturdy, these brushcutters are designed to handle intensive and continuous jobs, such as clearing thick grass, brushwood and shrubs, guaranteeing absolutely consistent quality over time. All models are equipped with a professional 3-tooth blade designed specifically for cutting back undergrowth. The technical features of our models ensure efficiency, high performance and maximum operator comfort in action.

Piston with 2 rings, nickel-plated diecast cylinder, forged connecting rod and crankshaft: all features guaranteed to make the engine extremely rugged and durable.

WALBRO digital coil with electronic control and revs limiter: for easier starting, enhanced performance thanks to uniform combustion, and reduced fuel consumption.

Large size paper air cleaner for enhanced filtration capacity and long working times.

Professional petrol engine Brushcutters

Designed to meet the needs of ground care professionals accustomed to tackling the toughest maintenance schedules in terms of both intensity and duration: clearing of extensive areas, both on flat ground and in hard to access locations, maintenance of green assets in rural areas and, more generally, clearing agricultural land.

AlwaysOn switch: rapid engine stopping and, thanks to the autoreset function, always ready to restart (**DS 5300, DS 5500**).

Aluminium clutch housing and cover: combines strength with lightweight construction, guaranteeing lasting reliability.

Innovative Load&Go ExtraLife head with reinforced knob: ensures extremely quick and simple reload, with just 20 seconds needed to rewind the line and resume cutting operations (**DS 5300, DS 5500**).

DS 5500 BOSS version: features an advanced anti-vibration system anchored with 2 steel springs to reduce the level of vibration transmitted to the operator.

Backpack petrol engine Brushcutters

The backpack brushcutters are designed to be carried on the shoulders like a backpack, to distribute the weight evenly. They are the ideal tool for professionals seeking a working machine that combines high performance with maximum comfort. These models use an engine housed in a frame and have a longer shaft than the other brushcutters, allowing them to be used even on terrain that is particularly inaccessible or difficult to reach. Thanks to the ergonomic backpack with height-adjustable shoulder straps and lumbar support in breathable material, the operator can enjoy unparalleled freedom for working near ditches, escarpments and undergrowth.

Piston with 2 rings, nickel-plated diecast cylinder, forged connecting rod and crankshaft: all features guaranteed to make the engine extremely rugged and durable.

Innovative Load&Go ExtraLife head with reinforced knob: ensures extremely quick and simple reload, with just 20 seconds needed to rewind the line and resume cutting operations (DSF 5500).

Model **DSF 5500** equipped with an ergonomic metal backpack, designed for enhanced comfort. The integral utility tote can accommodate a line head.

Large-sized paper air cleaner for enhanced filtration capacity and long working times.

Additional tools for Brushcutters - Pruner / Adjustable hedgetrimmers

Pruner PH 30

Model for home gardens, available with 10" guide bar and chain, adaptable to **DSH 250** and **DSH 2500** brushcutters.

Product number **61469208**

PH 30

Pruner EP 90

Adaptable to models **STARK 25** and **STARK 2500**. Same characteristics as model **EP 100**.

Product number **63069002C**

EP 90

Pruner EP 100

Implement for brushcutters with shaft diameter of 24 mm, 26 mm (excluding models **STARK 25**, **STARK 2500**, **DSH**) and 28 mm. Extremely easy and quick to fit, with no tools required: replaces the cutting head. The automatic oil pump mounted on the cutting implement ensures that an ideal flow is delivered to bar and chain at all times. The special profile of the fine, lightweight chain is designed to protect against the effects of kickback, thus offering maximum operator safety.

Product number **63069001E**

EP 100

Pruner EP 120

Professional model for intensive use, available with 10" guide bar and chain, adaptable to brushcutters with shaft arm diameter of 26 mm* (except for models **STARK 25**, **STARK 2500**, **DSH**).

Product number for version with 10" bar **63090033B**

* In order to use the attachment on **DS 3200** models it is necessary to replace flexible coupling shaft p/n **61280064AR**, with rigid adapter p/n **61280104** (can be ordered individually).

EP 120

Swivel hedgetrimmers HH 30

For use in home gardens, compatible with **DSH 250** and **DSH 2500** brushcutters.

Product number **61469209**

HH 30

Swivel hedgetrimmers

Compatible with rigid and backpack brushcutters with shaft arm diameter 26 mm (excluding models **STARK 25**, **STARK 2500**, **DSH**).

Model EH 50 (48 cm blade) is particularly suitable for hedge maintenance and can rotate through 270° with numerous fixed positions in between. Also available for pruner **PTX 2710**.

Model EH 48 is applicable to brushcutter **DS 2410**.

EH 48 p/n **58059012A** for shafts Ø 24 mm can be fitted to **DS 2800** model with adapter p/n **61280095**

EH 50 p/n **58059001B** for shafts Ø 26 mm can be fitted to **DS 3200** model with adapter p/n **61280104**

Accessories for Brushcutters - Line heads

Speed&Go: the revolutionary system that allows you to refill with line in just **10 seconds** a world first, revolutionary in terms of convenience, speed and ease of filling.

The head can be refilled using a ready-to-use pre-wound line disk featuring easy opening without using tools. For brushcutters from 20 to 40 cc.

The pack contains:

- Speed&Go head
- Line disk M (Ø 2.4 mm)
- Adapter M10x1.25 lh female thread

Technical specifications:

- Speed&Go easy line refilling system
- Tap&Go line feed system
- Replaceable aluminium eyelets
- Replaceable low profile cap
- Fibreglass reinforced structure

Just 10 seconds and 3 simple steps to refill

1

Open with a click...

by pressing the two side tabs with no need for tools.

2

Insert the disk...

on the aluminium plate and feed the two line ends through the eyelets.

3

Close!

by realigning the two halves and gently pressing them together **& GO...**

The innovative disk type refilling system is available in 2 sizes:

- M: Ø 2.4 mm / .095" (7 m / 275" of line)
- L: Ø 3.0 mm / .118" (5.5 m / 216" of line)

	Head	Part code	Line		Refill	Part code
	Ø 130 mm	63139002	Ø 2.4 mm		3 pcs Ø 2.4 mm – M line	63040300
					10 pcs Ø 2.4 mm – M line	63040302
					3 pcs Ø 3.0 mm – L line	63040301
					10 pcs Ø 3.0 mm – L line	63040303

Accessories for Brushcutters - Line heads

The smart line head: **twenty** seconds to refill,
zero tools required, **zero** difficulties encountered.

Extra life available with the optional metal reinforced cap.

The pack contains	Ø 103 mm	Ø 110 mm	Ø 130 mm	Ø 130 mm	Technical specifications:
Load&Go head	●	●	●	●	- Load&Go easy line refilling system - Tap&Go line feed system - Interchangeable reinforced aluminium eyelets - Reinforced cap with hex socket* - Reinforced plastic body

Metal knob	-	-	○	●	

● standard equipment ○ compatible tools

Just 20 seconds and 3 simple steps to refill

Load....

align the eyelets. Insert the line in the head through one eyelet and feed it out through the opposite one until obtaining two tails of identical length.

&...

turn the profiled knob counter-clockwise.

Go!

the head is now ready for use.

* When line thickness and length call for more effort to rewind the line.

Insert the spark plug wrench into the corresponding hex socket.

Turn clockwise.

Accessories for Brushcutters - Strimmer lines

Line	Type	Diameter		Length (m)	Mini blister	Length (m)	Blister pack 1 lb-0.450 kg	Length (m)	Spool 4 lbs-1.8 kg	Length (m)	Spool 17.64 lbs-8 kg
		mm	inches		Code		Code		Code		Code

High quality line composed of a blend of patented raw materials, with aerodynamic spiral cross-section. Slices through the air with minimal resistance, leading to reduced noise and lower vibration levels. Especially suitable for battery-powered or mains machines, this line reduces power absorption whilst ensuring high cutting speed and long life of both the motor and battery.

Technical specifications: ideal for grass and weeds.

Pro-Silent	spiral	1.6	.065"	15	63040314						
		2.0	.080"	15	63040315	123	63040317				

Top quality line made of co-polymers that assure the maximum resistance to wear and breakage.

Technical specifications: clean and precise cut; ideal for grass, weeds and scrub; high cutting speed.

Greenline	round	1.6	.065"	15	63040219A						
		2.0	.080"	15	63040220A

		4.0	.157"			31	63040257A	123	63040259	560	63042010A

Professional line that guarantees the maximum performance in terms of resistant to abrasion, breakage and sticking; the line has a double layer cross section: the core assures exceptionally high breaking resistance, while the outer sheaf provides wear resistance.

Technical specifications: ideal for grass, weeds, scrub and brushwood, even in the vicinity of stones and walls; high cutting speed.

Titanium	round	3.0	.119"			56	63040214B	168	63040210A*	1000	63042003A
		3.5	.139"			41	63040207B	123	63040211A*	736	63042004A

Professional line with an innovative profile that ensures the maximum cutting performance and top-of-the-range durability of up to 40% longer than conventional lines. Double layer cross section: the core provides very high breakage resistance, while the outer sheath imparts very high wear resistance. Excellent weld resistance to temperatures of up to 280°C.

Technical specifications: ideal for grass, weeds, scrub and brushwood, even in the vicinity of stones and walls; high cutting speed.

* Titanium packaging in rolls, weighs 3 lbs – 1.35 kg

Platin-Cut	serrated square	2.7	.106"	15	63040233A	57	63040241A				
		3.0	.119"			44	63040243A	175	63040245		
		3.5	.139"			32	63040250A	128	63040251	632	63042002A
		4.0	.157"			25	63040261A	99	63040263		

Innovative professional line that guarantees the utmost flexibility and abrasion resistance. Reinforced sawtooth profile for the maximum cutting performance.

Technical specifications: clean and precise cut; ideal for scrub, brushwood and undergrowth with diameters up to 12 mm; high cutting speed; quieter than conventional line and safer and more practical than a conventional steel blade.

		4.0	.157"			27	63040253B	143	63040274		

Lawnmowers for any grassed area, plus bespoke solutions.

Technology and comfort

Efco offers a range of machines for mowing different types of grassed areas. The push-type lawnmower was developed for use in confined spaces, where the agility of the machine is more important; in contrast propulsion-type lawnmowers are more suitable for the maintenance of larger size lawns. Our models are diversified also in terms of their technical features so they can meet all possible requirements: cutting height can be independently adjusted on each wheel or adjusted via a centralised control, starting can be manual or electric, and motive power can be provided by a battery, petrol engine or mains power cable. The professional lawnmowers are distinguished by their superior productivity on larger size areas, including irregular terrain, thanks to the steel transmission and front bumper, aluminium wheels, and reinforced deck.

Practical, lever-operated cutting height adjustment system.

Large-size wheels, ideal for even the roughest terrain.

4-cutting device: cutting system that includes mulching, collection and side discharge as standard with deflector for rear discharge.

Aluminium wheels: maximum strength, even when tackling the most demanding jobs.

Professional grade 3-speed transmission to modulate the ground speed to suit the type of work and the terrain.

The full bag indicator alerts the operator when the grass catcher needs emptying, thus eliminating constant stops to check the level and preventing spillage caused by overfilling.

Electric Lawnmowers

Maintenance of the open spaces around your home calls for versatile and practical tools, able to provide durable service and withstand prolonged use over time. The electric lawnmowers are ideal for looking after small and medium size areas. These mowers work efficiently in gardens and grassed areas, allowing simple, functional and low noise grass cutting. Unlike petrol engine models, electric lawnmowers provide a threefold advantage: no need for top-ups, zero pollutant emissions and major reduction in noise levels.

Independent cutting height adjustment on each wheel.

Blade operated by a practical lever on the handlebars.

The aluminium deck imparts greater strength and ruggedness to this model.

Battery-powered Lawnmowers

The transition to battery power offers significant benefits even for lawnmowers, including results that rival classic petrol engine machines. With these machines (of which **LRI 44** and **LRI 48** are also available in a self-propelled version), mowing duties benefit from ease of use, reduced noise levels and the complete elimination of exhaust gas. Forget about having to empty the fuel tank to prepare for winter storage, replace the spark plug, clean the air filter, or worry about stored fuel-oil mixture deteriorating: all this is no more than a distant memory with battery-powered motors, without any compromise in performance. The **LRI 44** and **LRI 48** are both equipped with a double battery housing, making it possible to extend running time with up to two 5 Ah batteries, sufficient for mowing larger areas. Both machines feature a steel deck, centralised cutting height adjustment controls, generously sized grass catcher and, for **LRI 48** models, a 4-in-1 cutting function, allowing for cutting without grass collection, with mulching system or side discharge. Model **LRI 40 P** is suitable for small gardens thanks to its compact plastic deck and maneuverability.

*** Available from spring 2021

COMFORT PLUS push-type Lawnmowers

Push-type lawnmowers are an excellent solution for home users dealing with maintenance of grassed areas no larger than 1,400 m² in size. The **COMFORT PLUS** series of lawnmowers was developed with special attention focused on ergonomics and functional styling. The steel deck imparts greater strength and ruggedness to this model.

The steel deck imparts greater strength and ruggedness to this model.

EMAK and Briggs & Stratton 4-stroke engines, designed using advanced technology that guarantees easy starting, optimum performance, reliability and a long working life.

Independent cutting height adjustment on each wheel.

The mulching blade supplied as standard and the streamlined deck ensure optimal cutting efficiency and perfect feed to the grass catcher.

LR 44 PK COMFORT PLUS

COMFORT PLUS self-propelled Lawnmowers

Self-propelled lawnmowers are the most suitable option for working on sloping lawns with overgrown areas. The main characteristic of self-propelled lawnmowers is the coupling between the wheels and the engine or motor. Thanks to this solution, the machine is accompanied rather than pushed and cutting performance is optimised. The **COMFORT PLUS** series, with single speed propulsion system, is the ideal solution for larger areas and for uneven or gently sloping ground. Also available: **TKE** models with battery starting for smooth and effortless start-up.

The steel deck imparts greater strength and ruggedness to this model.

Rugged and ergonomic plastic levers completely embracing the handlebar ensure a comfortable and positive grip.

The mulching blade supplied as standard and the streamlined deck ensure optimal cutting efficiency and perfect feed to the grass catcher.

Strong and versatile 70 L capacity plastic and fabric grass catcher (assembled without tools) with full-bag indicator.

ALLROAD PLUS 4 self-propelled Lawnmowers

In addition to rear pick-up mode, the **ALLROAD PLUS 4** series includes mulching operation and side discharge as part of the standard package. The single-speed propulsion system or propulsion with variable speed drive (model **VK**) combined with the large size of the wheels, make for smoother progress, even over uneven ground. Also available: **TBXE** and **TKE** models with battery starting for smooth and effortless start-up.

The steel deck imparts greater strength and ruggedness to this model.

Large size wheels (280 mm rear and 200 mm front) with ball bearings for smoother movement and optimal traction on all types of terrain.

"4-cutting device": cutting system that includes mulching, collection and side discharge as standard, with deflector for rear discharge.

Mulching kit as standard: the grass clippings are broken down into fine particles and released back onto the turf to keep the lawn clean and uniform after each cut.

ALLROAD ALUMINIUM self-propelled Lawnmowers

The **ALLROAD ALUMINIUM** models are a paradigm of ruggedness: with their 46 or 51 cm deck in 4 mm gauge diecast aluminium, the structure is designed to withstand impact and corrosion. The high capacity mulching blade and the streamlined shape of the deck assure optimal cutting performance and perfect bag filling, while the wheels with shielded ball bearings allow the machine to progress smoothly over all types of terrain.

4 mm gauge diecast aluminium deck: ensures low weight with high strength and excellent corrosion resistance.

Large size IMPACT series wheels (Ø 280 mm rear and Ø 200 mm front) with shielded ball bearings: guarantee of smoother movement and optimal traction on all types of terrain.

Mulching kit as standard: the grass clippings are broken down into fine particles and released back onto the turf to keep the lawn clean and uniform after each cut.

ALUMINIUM PRO self-propelled Lawnmowers

These machines are ideal for large size spaces of more than 2,000 m², also for continuous use; they ensure unvarying quality standards through time thanks to their technical solutions including the steel transmission, aluminium wheels and reinforced deck. The ergonomic two-piece handlebar allows easy manoeuvring of the mower. The cutting height adjustment system (handy knob in an easily accessible central position) and the plastic and fabric grass catcher (with full bag indicator) are just two of the solutions adopted for the maximum operator comfort.

4 mm gauge diecast aluminium deck: ensures low weight with high strength and excellent corrosion resistance.

Front bumper with integrated carry handle: increases the level of protection against accidental impact.

Large diameter aluminium wheels (208 mm front, 235 mm rear) with ball bearings and replaceable tyres.

Mulching kit as standard: the grass clippings are broken down into fine particles and released back onto the turf to keep the lawn clean and uniform after each cut.

MR 55 self-propelled professional Lawnmowers

Extremely rugged and with high load capacity, even on wet grass, these models offer all the features required by groundcare professionals (professional-grade aluminium transmission, 80 l grass catcher and large diameter aluminium wheels). Ideal for large areas (exceeding 2,300 m²) and continuous or intensive use, these models offer exceptional reliability and consistently first-rate performance over time.

Generously sized protections at the front and sides of the aluminium deck.

Centralised cutting height adjustment by means of a practical lever with preset positions.

Optional mulching kit: the grass clippings are broken down into fine particles and released back onto the turf to keep the lawn clean and uniform after each cut (bade + blade hub + plug).

Healthy soil that breathes and is nourished: for the flourishing development of our lawns.

Technology and comfort

Designed and engineered for demanding home users, as well as professional gardeners and groundskeepers, these are the ideal machines for freeing turf of moss and thatch. Lawns should be scarified at least twice during the season, as this will allow the soil to breathe and enable moisture, air and nutrients to reach the roots of the grass, favouring steady and healthy growth.

Sturdy hardened steel spikes (floating on the **SCA 50 H** model), ideal even for the hardest terrain.

Glides perfectly over any surface thanks to the sturdy wheels mounted on bearings (metal bearings on the **SCA 50 H** model).

Reinforced steel deck, designed to withstand even the harshest of conditions.

Height adjustment system with memory enables the machine to be set down quickly at the same height when repositioned.

Fold-down handlebar released by a handy lever, designed to save space during storage.

EURO 5 engines with low environmental impact: compliant with the most stringent anti-pollution regulations.

Scarifiers

Guide to selection

		HOME	COUNTRYSIDE	URBAN
SCARIFYING THE LAWN	For home use	SCA 38 R		
	Professional		SCA 50 H	

Scarifiers for home use

Practical and manoeuvrable scarifier for home use in gardens of up to 1000 m²; the ideal tool for use with lawnmowers for turf scarification in preparation for early-season grass cutting, it gets rid of weed, moss and thatch and provides better aeration of the lawn. Also useful prior to grass seeding and fertilisation, enabling better penetration of the soil.

Foldable handlebar to reduce footprint during storage.

Practical working depth adjustment lever. Located on the side of the handlebar, it enables quick and easy adjustment while using the machine.

Rotor comprising 15 fixed blades.

SCA 38 R

Deck	steel
Displacement	179 cm ³ (4.7 HP)

Working width	38 cm
Blades	15, fixed
Wheels	diameter 200 mm, plastic
Working depth	0-22 mm, adjustable with memory
Dimensions	130x59x109 cm
Weight	35 kg

Professional scarifiers

Lawn scarifiers of rugged construction equipped with powerful engines, designed to tackle even the most stubborn of soils with complete confidence. Regular scarifying and mowing will ensure lawns stay lush, green and healthy.

Working depth adjustment spring. Always maintains the preset position.

Metal wheels with ball bearings.

Rotor with 28 floating blades mounted on ball bearings and grease nipple system.

SCA 50 H

Deck	steel
Displacement	163 cm ³ (5.0 HP)

Wheels	diameter 210-250 mm, metal with bearings
Working depth	0-15 mm, adjustable with memory
Dimensions	120x82x102 cm
Weight	65 kg

All the power you need to tackle overgrown areas and woodland undergrowth, powerful cutting with no half measures.

Technology and comfort

Efco wheeled brushcutters and shredders guarantee exceptional cutting quality, including when tackling dense and thick-stemmed vegetation or medium diameter brushwood. Typified by high strength and cutting power, as well as superior operator comfort, these machines ensure that professional jobs of this kind can be completed swiftly and efficiently.

The cutting unit rotor, mounted on reinforced and shielded bearings, ensures the entire assembly is balanced and resistant to impact.

Ergonomic control levers (wheel lock release, brakes and gears) neatly arranged within easy reach.

Reinforced steel cutting decks, with large discharge area for release of cut material.

Large size rear wheels ensure smooth progress even in the presence of depressions and irregularities in the terrain.

Reinforced blade for effective cutting action even on thicker vegetation, brambles or undergrowth.

Easy cutting height adjustment by means of a worm screw lever.

Professional shredders

Professional flail mowers are designed for professional and intensive work on grass, shoots, twigs and low vegetation, scrub and stubble. These machines are ideal for heavy-duty applications that are beyond the reach of conventional mowers, such as clearing of overgrown areas, roadside verges, steep slopes, brambles and undergrowth. The professional cutting unit with 38/46 Y-shaped flails offers exceptional cutting quality, while the pivoting and lockable front wheels, fitted on model **DR 80 HR11**, make it possible to maintain the required cutting trajectory also when working in the proximity of steeply sloping terrain. Technology proceeds hand in hand with ergonomics: these models have comfortable handlebars with height and lateral adjustment, and the wheel release, brakes and gearbox control levers all grouped together and within easy reach.

Independent steering clutches on the driving wheels with wheel locking function, making the machine extremely easy to manoeuvre.

The handlebars have 4 vertical adjustment positions and 5 horizontal adjustment positions.

Rotor with powerful and sturdy 'Y' shaped knives to cut and shred grass and clippings efficiently with no risk of impact or damage.

The gear selection lever on the handlebar is simple to operate.

Tackle any lawn with comfort and power at the wheel of an **Efco** garden tractor.

Technology and comfort

A garden tractor is an invaluable helpmate for the management of large size gardens, grounds and public spaces. In situations of this type, the use of an agile and powerful garden tractor can make all the difference. Rugged and exceptionally manoeuvrable, **Efco** garden tractors are equipped with agile steering systems that allow them to negotiate even the tightest turns. The ease of manoeuvring in the proximity of trees and shrubs makes for greater precision and speed for lawn finishing operations. The **Efco** models are designed to adapt their progress to match the type of terrain. The hydrostatic transmission system means that direction of travel and speed can be controlled with a single pedal, without having to stop the machine. The engine – a decisive factor in relation to the tractive power of the machines and the cutters rotation system – comes in different power ratings for different models to ensure users can always find the right machine for the size of the garden or park to be managed.

“4-cutting device”: versatile cutting system that includes mulching, collection and side discharge as standard, with deflector for rear discharge.

The electromagnetic clutch engages quickly and quietly by way of a handy dash-mounted button.

New side-discharge lawn tractors with speed controlled by means of a double pedal that acts directly on the hydrostatic transmission. This solution allows reversal of the direction of travel and precise speed control during operation.

The LCD display provides quick and intuitive consultation of the main information of the garden tractor, including working hours, battery voltage, and fuel level.

Front axle cast in steel to withstand even the heaviest of duties and resist accidental impact.

Mulch/collect “Change over” system: using a handy lever, the operator can close off the collection duct and switch automatically to mulching mode, without stopping.

Rider Mowers

Rider mowers are designed to manage small and medium sized lawns of up to 4,000 m². Small and compact, with engine power of up to 13 HP, the rider mowers are designed to move with ease and precision around gardens with a large number of trees, bushes and other obstacles. Several models are convertible for mulching operation, while the 4-cutting device model can be set up for side clippings discharge by fitting a deflector, supplied as standard. Rider mowers offer a comfortable and safe driving experience in all situations and on all types of terrain.

Practical cutting height adjustment with a conveniently positioned lever, with a graduated scale to show the cutting height at a glance.

The telescopic bag emptying lever positioned within easy reach of the driver's seat allows the operator to tip and empty the full bag effortlessly and without twisting the body.

The electromagnetic clutch is engaged quickly and quietly by way of a handy dash-mounted button.

The garden tractor can be stored in a vertical position over winter to save space.

Side-discharge Garden Tractors

Side-discharge garden tractors are ideal for areas of up to 8,000 m². These models feature hydrostatic transmission for smooth travel and easily accessible controls conveniently located on the dashboard. Thanks to an easy-to-install kit, certain models can be converted for mulching mode operation: the mulching system keeps the clippings circulating under the deck for longer, reducing them to a fine particulate so they can be returned directly to the terrain where they constitute a valuable nutrient for the lawn.

Practical cutting height adjustment with a conveniently positioned lever, with a graduated scale to show the cutting height, selected from among 7 positions.

The electromagnetic clutch is engaged quickly and quietly by way of a handy dash-mounted button.

The quick-fit "Deck Wash System" connector on the mowing deck makes it possible to direct water inside the deck for quick and easy cleaning of the cutting mechanism.

Rear-discharge Garden Tractors

Rear-discharge garden tractors are the synthesis of strength and reliability, with elevated cutting and load capacity. Designed to manage areas of up to 9,000 m², these machines are equipped with hydrostatic transmission and an electromagnetic clutch for cutter blades engagement; they can also be set up to operate in mulching mode. The **EF 84/14,5 K** rear-discharge garden tractor, with its 84 cm cutting width, is perfect for cutting with pick-up in smaller spaces. The entire range of rear-discharge garden tractors is designed to meet the needs of more demanding users seeking advanced mowing performance combined with unprecedented driving pleasure. They can be set up for grass collection, using the generously sized grass catcher (up to 320 litres), for rear-discharge onto the ground, or to chop the clippings into fine particles and return them to the lawn as a nutrient (mulching function).

The quick-fit "Deck Wash System" connector on the mowing deck makes it possible to direct water inside the deck for quick and easy cleaning of the cutting mechanism (84).

Generously sized front bumper in steel for high strength and resistance in the case of accidental impact.

Professional all-terrain Garden Tractors

Rugged and reliable, professional all-terrain garden tractors are suitable for managing large size surface areas of up to 9,000 m². These machines are designed for clearing and tidying overgrown areas with thick vegetation and on uneven and sloping ground where pick-up is not required. These garden tractors are equipped with various devices to facilitate the work of the operator, such as the hydrostatic transmission controlled by a single pedal for travel direction and speed, the self-locking differential and the cutter drive electromagnetic clutch.

Self-locking differential for the maximum traction in all conditions of terrain and gradient.

The large tyre footprint and low centre of gravity combine to maximise stability of the machine, even on steeper gradients and when working alongside verges and ditches.

Equipped as standard with roll bar, front and rear bumpers, side protections and seat belt to assure the maximum safety, even when tackling the most demanding situations.

Halogen headlights and LED worklights ensure a good view of the cutting area, even in low light conditions.

Efco water pumps: readily accessible water power to irrigate the soil.

Technology and comfort

The complete range of **Efco** water pumps complies both with the needs of home users and with those of professionals, for use in agriculture and on building sites. Lightweight and practical but simultaneously rugged and exceptionally reliable through time, these units are designed for the irrigation of plants, vineyards and allotments or for emptying duties. **Efco** water pumps feature a high suction head to flow rate ratio for the utmost flexibility in all working conditions and optimal efficiency, also when located at a distance from water sources.

Thanks to its plastic body, the machine is extremely light.

Tough tubular steel frame facilitating transport of the machine and affording protection from accidental impact.

Self-priming water pumps: **Efco** models are characterised by an excellent Head/Flow Rate ratio.

Tough aluminium pump casing ensures maximum long-term durability.

Steel crankshaft and piston with 2 rings guarantee prolonged service life.

Non self-priming water pumps: **Efco** models are characterised by an excellent Head/Flow Rate ratio.

Self-priming Water Pumps

Self-priming water pumps are ideal for irrigation of gardens and small crop cultivation areas. Compact, extremely lightweight and reliable, these machines provide running time of one hour with a full tank. Model **MP 3000** features significantly reduced noise levels and vibration thanks to the new engine configuration, with its lower speed operating setting. Reducer fittings kit, complete with seals to ensure optimal watertightness and high performance. The fittings allow easy connection between the pump and the most commonly used rubber hoses.

Not self-priming Water Pumps

The non self-priming water pump is the optimal solution for handling high liquid flow rates, thanks also to its long operating time. This unit is equipped with a practical carry handle for easy transport and a solid tubular steel frame to protect it from accidental impact. The **PC 1050** non self-priming water pump is designed to provide lasting operation with reduced wear, thanks to the rugged pump body in aluminium and the ceramic mechanical seals. Reducer fittings kit, complete with seals to ensure optimal watertightness and high performance. The fittings allow easy connection between the pump and the most commonly used rubber hoses.

Easy to handle, versatile and smart: high performance for your groundcare requirements.

Technology and comfort

The backpack mistblowers are a paradigm of ergonomics and efficiency, combining top performance and operator comfort. The controls located on the handle are perfectly accessible, the tanks are generously sized, and the aluminium fan is safe and efficient. The petrol engine guarantees reliability and a long working life, while the adjustable jet allows the machine to be adapted to suit the type of treatment to be performed and the type of vegetation involved.

The opening angle of the jet can be adjusted rapidly and conveniently without having to stop working, enabling treatment to be customised according to each individual type of vegetation.

The controls are readily accessible and the handle can be easily adjusted in accordance with the crops to be treated, also with a forward angle for the optimal wrist position when spraying with the tube positioned vertically.

The booster pump (supplied on request) increases the liquid throw to improve reach height.

The optional ULV kit allows optimal atomisation of the sprayed liquid to ensure targeted treatment, eliminating overspray and wastage of product.

Maximum user comfort thanks to the ergonomic harness and vibration-damping system of the frame.

Easy-to-install powder kit affords numerous options for selection of the quantity delivered.

Backpack Mistblowers

		COUNTRYSIDE	URBAN
DISINFESTING PLANTS, VINEYARDS, ORCHARDS	Backpack		AT 800 / AT 8000 AT 900 / AT 9000

Backpack Mistblowers

For treatment and pest control of crops, small plantations and nurseries. These machines can deliver liquids (such as fungicides and pesticides) or powders. The mistblowers have an ergonomic harness and frame mounted on a vibration-damping system for the maximum user comfort.

Access to the filter is extremely simple without using tools for ease of maintenance.

The booster pump keeps the solution of liquids in the tank thoroughly mixed, increasing and stabilising the delivery flow rate of the product. Model **AT 900/AT 9000** is available also in a 'filling' version to fill the tank without having to remove the backpack.

Fastening the shoulder straps directly to the tank on model **AT 900/AT 9000** has made it possible to lower the mistblower's centre of mass to minimise oscillation during movements.

o compatible tools

Rugged and reliable, **Efco** rotary tillers prepare the terrain for small and large-scale landscaping projects.

Technology and comfort

Efco rotary tillers are rugged and reliable, manoeuvrable and easy to use. Safe and made of materials capable of guaranteeing lasting strength, **Efco** rotary tillers are a valid aid for gardeners, smallholders and landscapers working on medium sized plots. For higher levels of comfort, certain models are equipped with handlebars with height adjustment to adapt to the operator's stature, and lateral adjustment for easier working alongside crop rows without having to walk over previously tilled ground. Several accessories can be fitted to the machine, including an adjustable furrower and steel or tyred wheels, making it a multipurpose tool for use in the allotment and in the garden.

The chain guard is reinforced to withstand flying stones and accidental impact.

The front wheel is included for transport purposes, and can be raised when the machine engages the soil.

External gear selector, ergonomically designed and easily accessible.

The handlebars are fully adjustable: up and down, to adapt to the user's height and build, and sideways (offset), allowing the operator to walk alongside crops without treading on the freshly turned soil.

Towing hitch.

Oil-bath gear drive for high mechanical strength and reduced maintenance.

Air to keep your outdoor spaces clean, from the garden to the drive: a solution for home users and professionals alike.

Technology and comfort

Silent, lightweight and easy to use, **Efco** blowers and vacuum cleaners are valid, reliable work companions. Powerful and efficient tools designed to clear leaves, olives, hazelnuts and small debris from any surface: in private settings, to clear small areas (handheld blowers), and for professional use on farmland and in large urban spaces (backpack blowers).

"VibCut" professional anti-vibration system, utilizing mounts with 4 steel springs to isolate the operator totally from machine vibrations.

Rubber covered handle ensures a firm and comfortable grip on the machine, while at the same time isolating the hands of the operator from vibrations.

Vacuumed material is chopped up by a rotor with 4 steel blades (standard feature) to reduce the volume when inside the bag, down to 1/12 of original size, so that more work can be done with fewer emptying stops.

Double bladed fan delivers high performance in terms of air flow and velocity, while increasing the cooling capacity of the engine.

Paper air filter with increased capacity and filtration surface area; allows efficient and quick maintenance and is more durable.

Digital coil with variable ignition advance and flywheel with new fin geometry: engine guaranteed to run more smoothly, and cooling rendered more efficient.

Handheld Blowers and Vacuum Cleaners

Ideal for clearing the garden of leaves and other small debris or grass cuttings, the handheld blower is designed to get the job done quickly and efficiently. Model **SA 2500** combines high performance with perfect balance, while its light weight enables prolonged use without fatigue. The rubber-clad handgrip and professional anti-vibration system ensure maximum operator comfort at all times. Model **SA 3000** combines high performance with quiet operation, so it can be used in built-up residential areas. This model also features very low vibration levels, thanks to the rubber-clad handle and VibCut professional antivibration system, to ensure maximum operator comfort at all times. With the dedicated conversion kit, which is available to order, the appliances can be converted into handy vacuum cleaners with a 36-litre collection bag to create effective tools for the removal of leaves, grass cuttings or small wood debris.

Star-shaped metal shredder blade. Mounted on the standard fan, the shredder blade is invaluable when the tool is used with the vacuum cleaner kit (optional).

'S' style scroll assembly: eliminates twisting force, guaranteeing enhanced comfort during prolonged use of the machine (**SA 2500**).

Telescopic tube that allows the machine to be stored in confined spaces, without the use of tools (**SA 2500**).

Backpack Blowers

Backpack blowers are designed for use in rural areas, for clearing spaces such as farmyards and forecourts, and in the city, for clearing parks, sports grounds, flowerbeds and roads. They are also recommended for moving and compacting fruit and other produce as it falls from the tree. Low weight plus high air velocity and air delivery volume mean these tools can guarantee practicality, power and high performance.

Cleaning anywhere,
in all conditions:
cleanliness and hygiene take
centre stage with **Efco**
high-pressure washers.

Technology and comfort

Combining the power of water and pressure produces amazing results. **Efco** high-pressure washers are technologically advanced machines designed to clean and sanitise all types of surfaces. While the cold water high-pressure washers are perfect for cleaning duties around the home, the hot-water models are more suitable for use in industrial surroundings or for cleaning very large areas, including courtyards and covered walkways.

Axial 3-piston pump with thermal protection.

Water suction quick fitting.

Easy transport thanks to large sized wheels.

Practical handle for easier movement.

Removable detergent tank with externally visible liquid level.

Practical storage recesses to ensure accessories are always in easy reach.

Cold water High-pressure Washers

The range of cold water high-pressure washers meets the needs of home users engaged in either occasional or intensive cleaning activities. These machines are designed to assist with cleaning of areas outside the home, in the garden, and of objects and vehicles. Packed with features for different types of use, these machines incorporate several devices aimed at maximising user comfort such as the large wheels for ease of transport and the generously sized recesses for stowing accessories and the power cable.

The maximum loading performance and exceptional stability: **Efco** transporters fear no rivals.

Technology and comfort

Ideal for use in building construction and agriculture, **Efco** transporters are designed to carry bulky and heavy loads, also over steep and uneven terrain. Designed in compliance with the highest quality standards, these machines offer optimum performance in terms of load capacity, reliability through time, and safety. The load capacity ranges from 450 to 550 kg, allowing these machines to be used in rural surroundings, in the garden and around the farm or on building sites.

Telescoping flat body optimises transport operations, even with bulky loads.

Wide crawler tracks ensure solid grip on any type of terrain.

Tight turning radius for ease of manoeuvre on building sites or in greenhouses and vineyards.

Rugged undercarriage with track tensioner sprocket, perfectly balanced for correct weight distribution and excellent grip on all types of terrain.

Rear metal guard to maximize operator safety.

Rugged steel chassis. A low centre of gravity provides optimal stability during the job, also when working on steep gradients. The high position of the engine and transmission facilitates maintenance tasks.

Compact Transporters

Compact and manoeuvrable, small transporters facilitate the transport of materials of various types, from firewood to fruit. Thanks to their features, these machines are perfect for use in rural areas for transporting loads in confined spaces and on sloping terrain. Their tight turning radius (700 mm), not only makes the transporters easier to manoeuvre, it also helps protect the surrounding vegetation during transit of the machine.

Handlebar-mounted gear lever.

Speed selection control lever.

Manual dump with automatic locking system.

High sides kit to facilitate transportation of bulky loads (compatible).

Protective Clothing

Professional jacket with anti-cut protection

Extremely lightweight and breathable comfort model professional anti-cut safety jacket, reinforced with waterproof fabric with abrasion resistance in the areas most subject to wear. The jacket assures a comfortable fit and freedom of movement for safe use of all chainsaws with cutting speeds of up to **20 m/s**. Anti-cut protection with “Sofly” technology: 5 layers of high-strength anti-cut fabric, extremely light, flexible and breathable. Antibacterial treatment and fast drying performance help to banish odours while enhancing the sensation of freshness and comfort for the wearer. Slim fit.

Safety	<ul style="list-style-type: none"> • CE approved to EN ISO 13688: 2013, EN 381-11: 2003, Class 1. • Category 3 PPE. Certified to EU 2016/425. • Special 8-layer anti-cut protection (sofly). 			
Visibility	<ul style="list-style-type: none"> • Large orange coloured trim for the maximum daytime and night-time visibility. 			
Fit	<ul style="list-style-type: none"> • Excellent fit thanks to the anti-cut fabric technology (sofly).

Lubricants and sundry Accessories

Lubricants

Alkilate petrol for 4-stroke engines and Special mixture for 2-stroke engines

EFCO-Alkilate is a highly refined petrol specifically formulated for 4-stroke engines. **EFCO-Mix Alkilate** is a mixture for 2-stroke engines made from alkylate petrol and biodegradable* synthetic oil compliant with API TC, JASO FC and ISO L-EGD standards. This fuel is premixed and hence ready for use.

* Tested to CEC-L-33-A-93 (80% in 21 days) and OECD 301E (64%).

These fuels contain 10 times less harmful substances than traditional petrol and less than 0.1% benzene and other harmful aromatic hydrocarbons and are therefore less hazardous for health and for the environment. The fuels guarantee: high performance and longer engine life. Extremely pure and stable, the fuels have a long shelf life (up to 4 years in sealed containers with no loss of performance).

EMAK-Mix Alkilate – 18 l metal container	3355007
EFCO-Alkilate – 5 l container	3455012
Not available on all markets.	

PROSINT 2 EVO special oil for 2-stroke engines

Special synthetic ester-based lubricant, expressly formulated for high-performance 2-stroke engines. Special oil for use at 2% (50:1). Effective lubrication at high temperatures. Low emissions, reduced wear and clean engine. Exceeds API TC, JASO FC and ISO-L-EGD specifications. Its pre-fluidified composition makes preparing the mixture easy. Colour: dark red. Pack: carton 20 pcs x 100 ml or 12 pcs x 1 l or 4 pcs x 5 l.

100 ml bottle	001001363A

Special grease

Special high quality lithium grease with molybdenum bisulphide for bevel gear pairs, elastic couplings, hedgetrimmer transmissions, earth auger gear reducers. Recommended for use with all mechanical parts subject to high loads. Exceeds ISO 6743-9; DIN 51825 KPF 2K - 30 specifications. Special grease/125 g tube. Pack: carton. Quantity per carton: 24. Minimum order: 2 cartons.

Each equipped with dispenser nozzle and slot for display fixture.

125 g tube	4174238B
------------	-----------------

ADDITIX 2000 EVO special additive for petrol fuels

Special additive ideal for conditioning two-stroke mixture and leaded or unleaded petrol. Prevents deterioration of fuel for at least 12 months and protects against oxidation. Facilitates starting, keeps fuel system clean (up to the intake valves in the case of 4-stroke engines), and protects against rust and corrosion. It also increases the octane rating. The dispersing-detergent agents in the product disperse any traces of water in the fuel. Pack of 24 x 125 ml bottles. Two full doser caps are sufficient for 5 l of petrol.

125 ml bottle	001000972A
---------------	-------------------

Multipurpose concentrated degreasing detergent

High concentration detergent to obtain excellent results in the cleaning of heavily fouled surfaces such as mechanical parts, engines, tools for gardening, agriculture, and forestry, bicycles and motorcycles. 1 L bottle with spray dispenser. Pack containing 6 pcs x 1 L or 4 pcs x 5 l. Minimum order: 1 carton.
