## **About This Guide**

This guide provides a brief introduction to the Outdoor Security Wi-Fi Camera and the Tapo app, as well as regulatory information.

Please note that features available in Tapo may vary by model and software version. Tapo availability may also vary by region. All images, steps, and descriptions in this guide are only examples and may not reflect your actual Tapo Camera experience.

## Conventions

In this guide, the following convention is used:

Convention	Description
Blue	Key information appears in teal, including management page text such as menus, items, buttons and so on.
<u>Underline</u>	Hyperlinks are in teal and underlined. You can click to redirect to a website.
Note:	Ignoring this type of note might result in a malfunction or damage to the device.

## More Info

- Specifications can be found on the product page at <u>https://www.tapo.com</u>.
- Our Technical Support and troubleshooting information can be found at <a href="https://www.tapo.com/support/">https://www.tapo.com/support/</a>.
- The setup video and waterproof cable attachments video can be found at https://www.tp-link.com/support/setup-video/.

## Introduction

Tapo C310 is a full-featured weatherproof security camera that you can access from anywhere. Receive instant notifications and check feeds when the motion is detected. Moreover, the automatic siren system will trigger light and sound to frighten away unwanted visitors after the camera detects motion. Day or night, rain or shine, the Tapo camera protects what you love most.

- 3MP High Definition Delivers high resolution video helping you never miss a detail.
- Wired or Wireless Networking Connect the camera to your network through Ethernet or Wi-Fi for more flexible installation.
- Weatherproof Helps Tapo C310 perform well even in harsh environments with rain and dust.
- Night Vision Provides a visual distance of up to 98 ft (30m) even in total darkness to always keep you safe.
- Two-Way Audio Communicate with others with the built-in microphone and speaker.
- Local Storage (up to 128 GB) Stores 3MP video directly to a local microSD card, offering convenient access to your video footage.
   \*microSD card needs to be purchased separately.

## System LED Description

Solid red	Starting up
<b>Blinking red and green</b> (for Wi-Fi setup)	Ready for setup
<b>Blinking red slowly</b> (for Wi-Fi setup)	Connecting to Wi-Fi
Solid amber	Connected to Wi-Fi or wired network
Solid green	Connected to TP-Link Cloud server
Blinking red quickly	Camera resetting
Blinking green quickly	Camera updating

## Set Up Your Camera

Follow the steps below to get started with your new camera, or you can follow the setup video at https://www.tp-link.com/support/setup-video/.

## Step 1. Download Tapo App

Get the Tapo app from the Apple App Store or Google Play, or by scanning the QR code below.

## Step 2. Log In

Open the app, and log in with your TP-Link ID. If you don't have an account, create one first.

### Step 3. Add Your Camera

Tap the  $\oplus$  button in the app and select your model.

## Step 4. Configure Camera

Follow app instructions to set up your camera via wired or wireless connection (for setup only), and add it to your home network. After setup, you can use your camera via wired connection or wirelessly.

Note: For Wireless setup, if your camera is connected to your router via an Ethernet cable, please unplug the cable first.

# Set Up Using Amazon Frustration-Free Setup

## What is Amazon Frustration-Free Setup?

Amazon Frustration-Free Setup can help connect and set up Tapo smart devices in fewer steps, without having to remember and re-enter your Wi-Fi password on each device.

To use this feature, confirm the following:

- The new Tapo device supports Amazon FFS.
- You have an Amazon FFS enabled Alexa device or router.
- You have saved your Wi-Fi information to Amazon by using Alexa echo.
- Your Tapo device and router are on the same network as your Alexa echo.

## LED Indications during Amazon Frustration-Free Setup

LED	Status
Blinking amber and green	Ready for setup
Blinking amber	FFS setup in progress
Solid green	Working properly

If the LED does not turn solid green after a long time, you can try to add the Tapo device manually. (Press the Reset button on your Tapo device once. Then open the Tapo app, tap the + button on the page, select your device model, and follow the app instructions.)

## How to use Amazon Frustration-Free Setup with Tapo devices

1. Open the Amazon Alexa app. Then tap More and select Skills & Games.

2. Enter Tapo in the search bar and choose Tapo.

#### 3. Tap the ENABLE TO USE button.

4. Log in with your TP-Link ID that has bound to your Tapo device, and tap Authorize. After authorized successfully, the message Tapo has been successfully linked will come up.

5. Plug in your Tapo device and the setup will complete automatically in two minutes.

For setting up more Tapo devices, just plug in and enjoy!

#### Done!

If this device displays on the Home page in the Tapo app, it indicates this device has been successfully associated with your Amazon account and joined your Wi-Fi network automatically.

If this device does not display on the Home page in the Tapo app, try setting it up manually. (Tap the + button on the page, select your device model, and then follow the app instructions.)

## Install a microSD Card

Follow the steps below to install the microSD card for local recording, or follow the installation video at <u>https://www.tp-link.com/support/setup-video/</u>. You can go to <u>Camera Settings</u> > microSD Card in the Tapo app to check the card status or format your card.

1. Loosen the screws on the back panel and remove the cover.

2. Identify the direction of the microSD card and carefully insert the card into the slot. Push in the card until you hear a clicking sound.

## **Mount Your Camera**

When you finish adding your camera in the Tapo app, you can place your camera on a flat surface, or mount it on a wall or ceiling with the provided mounting template and screws.

Follow the steps below to mount your new camera, or follow the setup video at <a href="https://www.tp-link.com/support/setup-video/">https://www.tp-link.com/support/setup-video/</a>.

## Step 1. Drill Holes

Stick the mounting template to the desired mounting place. Drill 3 screw holes according to the template.

## Step 2. Mount Camera

Insert three anchors into the holes and use the screws to affix the camera over the anchors.

## Install Waterproof Items

When the camera is installed outdoors, please install waterproof items to waterproof your camera. Make sure each part is securely attached and the water-proofing rings are flush to keep out water.

Follow the steps below to install waterproof items, or follow the installation video at https://www.tp-link.com/support/setup-video/.

### Install Waterproof Cable Attachments

Install the waterproof cable attachments for the network interface when the camera is installed outdoors.

1. Route the network cable through the following components in order: fix nut, waterproof ring, and then the waterproof jacket.

2. Insert the waterproof ring into the waterproof jacket.

3. Fix the O-ring to the network interface of the camera and connect the network cables.

4. Attach the network interface with the waterproof jacket, then twist to lock. Rotate the fix nut to secure it to the waterproof jacket.

**Done!** The network interface is now waterproof.

## Install Waterproof Seal for Power Connectors

Install the waterproof seal for the power connectors when the camera is installed outdoors.

## Main Camera Controls

After you successfully set up the camera, you will see your camera listed on the home page. You can view and manage your camera from anywhere at any time with the Tapo app.

### **Home Page**

This page lists all your cameras you've added and you can view them directly and manage them easily. Tap the camera or go to Camera Preview > Manage to enter the Live View page.

#### Me

On this page, you can edit your account, quickly check the memorable moments you saved, or find the FAQs of using smart camera and basic info related to the Tapo app.

## **Camera Detection & Alerts**

Receive notifications and check feeds when the camera detects a motion, or when someone crosses a boundary, enters an area you've set, or obstructs the camera. Insert a microSD card to record the clips when activity detected. Otherwise, you can only receive the notifications.

**Note:** Initialize the SD card on the Tapo app before using it.

#### Step 1: Turn On Detection

Go to Camera Settings page and tap Detection & Alerts to turn on the detection and customize its alert settings.

#### **Motion Detection**

When your camera detects motion, it will send you notifications or even sound an alarm. You can personalize your own experience by setting motion zones to only capture what happens in the area that you set and adjusting motion sensitivity.

Note: The microSD card is needed for recordings. Initialize the SD card on the app before using it.

## **Privacy Mode**

On the Live View page, tap Privacy Mode to enable the Privacy Mode. When enabled, streaming and recording functions will be temporarily disabled to protect your privacy. You can tap Disable Privacy Mode to exit Privacy Mode and the camera will be back to work.

## How to Reset Your Camera

Follow the steps below to reset your camera via the Reset button, or follow the installation video at <u>https://www.tp-link.com/support/setup-video/</u>. You can also go to <u>Camera Settings</u> in the Tapo app and tap <u>Remove Device</u> at the bottom to factory reset your camera.

1. Loosen the screws on the back panel and remove the cover.

2. Press and hold the Reset button for at least 5 seconds until the LED blinks red.

## Authentication

FCC compliance information statement

**Responsible Party:** 

Product Name: Outdoor Security Wi-Fi Camera Model Number: Tapo C310

Component Name	Model
AC ADAPTER	T090060-2B1

**TP-Link USA Corporation** Address: 10 Mauchly, Irvine, CA 92618 Website: http://www.tp-link.com/us/ Tel: +1 626 333 0234 Fax: +1 909 527 6804 E-mail: sales.usa@tp-link.com

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/ TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference.

2. This device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

### FCC RF Radiation Exposure Statement

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This device and its antenna must not be co-located or operating in conjunction with any other antenna or transmitter.

"To comply with FCC RF exposure compliance requirements, this grant is applicable to only Mobile Configurations. The antennas used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter."

We, **TP-Link USA Corporation**, has determined that the equipment shown as above has been shown to comply with the applicable technical standards, FCC part 15. There is no unauthorized change is made in the equipment and the equipment is properly maintained and operated.
